

# **SHORT-TERM STUDY COURSES**

**IN ST. PETERSBURG HIGHER EDUCATION INSTITUTIONS**

## Short-Term Study Courses

St. Petersburg universities and colleges offer an extensive choice of educational services for foreign students. In addition to classic degree courses leading to a Bachelor's, Chartered Specialist's or Master's diploma, they offer a variety of short-term study courses, which cover many different subjects and are available to everyone at any time during the academic year.

### Some of the more popular short-term courses offered by St. Petersburg higher education institutions are:

1. Foundation courses
2. Summer schools
3. Inclusive courses
4. Research internships

**1. Foundation courses** involve intensive Russian plus a whole range of additional subjects that foreign students typically need in order to progress to a Bachelor's, Chartered Specialist's or Master's degree course in St. Petersburg. Every student having successfully completed a foundation course receives a standard national certificate entitling them to enroll in any Russian university or college without admission tests.

**2. Summer schools** typically take 1 to 2 months, covering many different subjects. Some of the most popular courses are in Russian Language or Culture, Business, Economics and a few other broad fields.

**3. Inclusive courses** typically focus on the Russian Language and Culture, Business, Economics, or other subjects, and take from one week to one semester at a St. Petersburg university or college. These courses are usually taught by agreement with another educational institution on partnership in certain study fields or subjects.

**4. Research internships.** Many St. Petersburg universities and colleges offer research internships, which can take between 1 and 12 months. Research internships are available in many different fields.
